

FADY WAGEIH FAKHRY

Software Engineer — Full-Stack (.NET / MERN / Angular)

01022469810 | Fadywageih14@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER OBJECTIVE

Business Information Systems graduate (GPA 3.59/4.00) and Full-Stack Software Engineer with hands-on experience across **.NET and MERN stacks**. Experienced in owning features end-to-end — from REST API and database design in C#/.NET or Node.js to delivering responsive Angular and React front-ends and shipping production-ready systems.

EXPERIENCE

Full-Time Web Developer — TradeX

Oct 2025 – Mar 2026

- Built and shipped Givora ([getgivora.com](#)), a full-stack MERN application, from architecture through production deployment — see Technical Projects.
- Also delivered the Trade X front end (vanilla JavaScript).

Web Development Intern — Codesoft (Remote)

Sep 2023 – Oct 2023

- Implemented backend features and role-based access control in Laravel applications, enabling a 20% faster client rollout.

TECHNICAL PROJECTS

MasrAcademyTech — Online Course Platform — C#, ASP.NET Core MVC, EF Core, SQL Server, Tailwind CSS, Paymob

- Full-featured course platform with Google/Email authentication, Paymob payment integration (Cards + Vodafone Cash) with webhook-driven auto-generated activation codes, and download-protected video streaming.
- Built with Clean Architecture and Repository/Unit of Work patterns for full separation between data, business, and presentation layers.

DownTech Platform — C#, ASP.NET Core (.NET 8), EF Core, JWT, SQL Server, Angular

- Full-stack platform for laptop/PC sales, accessories, and repair-service requests, plus a request system for businesses to commission custom software/websites.
- Implemented JWT authentication with role-based authorization (Admin/SuperAdmin) on a layered Clean Architecture (Domain/Services/Persistence/Shared), and a ticketing system for maintenance issues with status workflow and admin assignment.

Givora — Online Marketplace — Node.js, Express, React, MongoDB — [Live](#)

- Full-stack MERN application taken from concept to production; designed responsive React UI and scalable RESTful APIs with Node.js/Express.
- Owns the full deployment lifecycle: live server configuration and custom domain setup ([getgivora.com](#)) via Hostinger.
- Worked on production systems used by real users, handling deployment, configuration, and post-launch updates.

Talabat-Style E-Commerce Platform — C#, ASP.NET Core, EF Core, SQL Server, Angular, Swagger

- Built the REST API backend (authentication, cart/ordering flow, Stripe payment integration) for a real-time e-commerce platform.
- Later rebuilt the project end-to-end: strengthened the backend with Entity Framework and Swagger documentation, and independently designed and built the complete Angular frontend.

Taleb Discount App — C#, .NET, SQL Server, REST APIs, Angular, Tailwind CSS

- Graduation project (95%). Three-role platform (vendor, school student, university student) for generating and redeeming supplier discounts.

Restaurant Management System (MVC) — C#, ASP.NET MVC, SQL Server, Bootstrap

- Full CRUD web app for managing restaurant operations.

Portfolio Website — HTML, Tailwind CSS, JavaScript

- Personal portfolio with responsive design.

More projects available on GitHub — see link above.

EDUCATION

B.Sc. Business Information Systems — Helwan University, Faculty of Commerce & Business Administration — Zamalek, Cairo

Sep 2021 – Jun 2025

- Graduated with highest distinction — GPA 3.59/4.00.

CERTIFICATIONS

- Summer Internship Program — CIB Egypt
- .NET Development Diploma — Route Academy
- Frontend Web Development Internship — Elevvo Pathways
- Human-Centric Interpersonal Skills — CIB Egypt

TECHNICAL SKILLS

Languages: Python, C#, SQL, JavaScript (ES6+), HTML/CSS

Frameworks & Libraries: ASP.NET Core, MVC, Entity Framework, LINQ, Angular, React, Node.js, Express, Tailwind CSS, Bootstrap

Architecture & Concepts: RESTful APIs, OOP, Microservices, Message Queues (RabbitMQ), MVC Architecture, Agile Development, System Analysis

DevOps & Tools: Docker, Git, Jira, Slack, Swagger, Visual Studio, VS Code, SSMS, Hostinger

Databases: SQL Server, MySQL, MongoDB
